- a. Group I, claims 1-7, and 14-19 are drawn to an apparatus for monitoring a protraction of a seat belt/ a strain in a load limiting structure is classified in class 280.
  - b. Group II, claims 8-13 and 20 are drawn to a method of monitoring the protraction of a seat belt is classified in class 242
2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical features of group I include "a magnetorstrictive sensor positioned to receive electromagnetic signals". In contrast, the special technical features of Group II include method step of "monitoring with a motor vehicle safety system an output of an electrical coil".
3. During a telephone conversation with Mr. Drayer, Lonnier on February 25, 2005 a provisional election was made without traverse to prosecute the invention of Group I,

claims 1-7, and 14-19. Claims 8-13 and 20 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
